Common Sense Economics for Life!

A Course Package
That Will Turn On the
Lights for Your Students

CommonSenseEconomics.com

Four Key Parts of the Course

Part I. Twelve Key Elements of Economics

Key concepts including scarcity, gains from trade, marginal decision making, supply and demand, profits and losses, sources of economic growth, and the invisible hand are highlighted and discussed.

Part II. Seven Major Sources of Economic Progress

Explains the importance of rule of law, private ownership, competition, monetary stability, low taxes and open trade as sources of wealth creation and prosperity.

Part III. Economic Progress and the Role of Government

Describes the protective and productive roles of government. Compares and contrasts how the political process works relative to markets. Explains why it often goes awry, and makes suggestions for improvement.

Part IV. Twelve Key Elements of Practical Personal Finance

Highlights key elements of sound personal decision-making including career choice, budgeting, saving, investing, insurance, and wise use of credit.

On completion, students will understand

- Both market and political allocation of resources
- Why some economies grow while others stagnate
- The relationship between sound personal choices today and success in the future

Common Sense Economics covers what students really need to know in order to make wise choices as consumers, investors, voters and citizens.

Tap into the power of Common Sense: Economics for Life! Course Package, CommonSenseEconomics.com, and the accompanying book *Common Sense Economics* by James Gwartney, Richard Stroup, Dwight Lee, Tawni Ferrarini and Joseph Calhoun (St. Martin's Press, 2016). These innovative instructional tools will equip you with everything needed to teach an effective and exciting course!
